

AMENDMENTS TO THE SPECIFICATION

DescriptionBACKGROUND AND SUMMARY OF THE INVENTION

[00001] The invention relates to a retaining clamp for securing objects, in particular gas storage cylinders for airbags.

[00011] As an alternative, however, provision may also be made for the sheet-metal strip to have just a single opening for the clamping securing bolt and for the ends of the sheet-metal strip to be connected to each other at a distance from the opening, preferably by the two end portions being hooked together in such a manner that, after being securely clamped on the object, they can no longer be detached from each other.

BRIEF DESCRIPTION OF THE DRAWINGS

[00012] In the following text, the invention is explained in greater detail with reference to a plurality of exemplary embodiments which are illustrated in the drawing, in which:

[00035] Figures 30 to 32 show plan views of various embodiments of a head of the press-in screw.

DETAILED DESCRIPTION OF THE INVENTION

[00036] The drawings illustrate the invention with reference to various exemplary embodiments, specifically, Figure 1 shows a view of a gas storage cylinder 1 having two retaining clamps 2 which serve to secure the gas storage cylinder 1 on a body part of a motor vehicle.
